

Zach Havens

Master's Student - HCI Lab
Department of Computer Science
University of Manitoba
Advised by Dr. Celine Latulipe

- » Former Software Engineer at Google who worked on consensus systems
- » Studying how online banking systems support users who perform tasks on behalf of older adults
- » Investigating the use of behavioural nudges to encourage financial propriety
- » Focused on how older adults can use their data to gain the most value they receive from informal caregivers while minimizing privacy and security risks
